Technology: MVC, SOA, SaaS, Rest, Networking, SAN, Wireless, Mobile, Barcode
Miscellaneous: Development Methodologies (Traditional, Agile, Test Driven Development, Prototyping), Project Management familiarity, Photoshop, Video formats and editing.

PROFESSIONAL EXPERIENCE

INTERNATIONAL BUSINESS MACHINES, Boulder, CO

Senior Java/PHP Developer (Contractor), IBM Global Services, Boulder, CO 2009 – Current

Served as lead developer for tracking, provisioning and Financial Billing system for the Managed Storage Services area. This Intranet web application is written in Java and PHP, using a wide variety of Open Source tools (Hibernate, Spring, JPA, Google Web Toolkit, Velocity, Smarty Templates, etc.).

- Performed requirements analysis, architecture, design, project planning and code development to help the client achieve automation of manual tasks.
- Served in an advisory capacity, offering suggestions and improvements for creating a robust development environment, improved infrastructure design, and reducing exposures in the overall development process.
- Served as primary DBA for DB2 and MySQL databases (both production and development).

INTERNATIONAL BUSINESS MACHINES, Boulder, CO

Senior I/T Specialist, IBM Global Services, Boulder, CO 2005 – 2008

Served as overall Architect and Team Leader for a large Intranet Java Web application with over 30,000 users and approximately 15 developers and architects in 7 countries.

- Performed architecture, resource allocation, project planning, code development and coordination of a large, remote global development team.
- Organized, managed, and consolidated from windows servers and consolidation from windows servers to the customer.

INFORMATION ONLY

INTERNATIONAL BUSINESS MACHINES (continued)**INFORMATION ONLY**

- Served as Team Leader for the Rational Application Developer V7 project, user interface design and implementation.
- Developed and implemented new functions in all areas of the application, including web pages, command beans, and business logic, delivering personal development tasks on or ahead of schedule.
- Led an effort to migrate/convert the global team to Rational Application Developer V7 from a variety of other IDEs, generating synergy and improving developer efficiency.

Senior I/T Architect, IBM Global Services, Boulder, CO 2003 – 2005

Served as Application Architect on the Barcode Initiated Manufacturing team.

- Performed overall architecture and design on a complex Java application, installed in multiple worldwide geographies.
- Provided guidance, leadership and technical expertise for the programming team, resulting in smooth workflow throughout the development cycle.
- Recommended innovative enhancements and assisted the customer with developing and implementing strategic goals and detailed requirements.
- Fulfilled the role of developer to implement the most complex, critical areas of the application and to ensure that tight schedules were met.

Senior I/T Specialist, IBM Global Services, Boulder, CO 1996 – 2003

Served as Development Team Leader on the Barcode Initiated Manufacturing team.

- Developed and maintained automated software manufacturing applications in the Java and C languages, reducing manual labor and drastically increasing quality and efficiency for the customer.
- Initiated, organized and led an ongoing committee of the Team Leaders across the organization to generate synergy, coordinate and implement new methodologies and facilitate process improvements.

Programmer/Staff Programmer, IBM Software Manufacturing, Boulder, CO 1988 – 1996

Served as Team Leader on 3 applications: Finance, Customer Service, and Order Processing.

- Led all development activities, resulting in overall project success and high customer satisfaction.
- Originated, developed and supported several Lotus Notes applications, which increased efficiency for all eight departments in the development organization.
